

I have wanted to thank you for the ChatterVox for over a year now. Each and every day I enjoy the help of my portable voice amplifier as I teach my beginning band students.

A vocal music teacher in our school district introduced ChatterVox to me. She started using it after her surgery for nodes on her vocal cords. I thought that I might buy one so that I could prevent vocal nodules. I told her that I would plan on using it when I had a sore throat or cold. Her exact words to me after I said that were, "Oh, you can try that...but you'll end up using it every day, all day long!" She was right.

The students can hear my voice as I play a piano accompaniment. I do not need to stop instruction as often with the device. Many students have commented that "my voice sounds nice with the microphone."

Before ChatterVox I went home to my family at the end of the work day with little voice. My daughter knew the routine...when family members called to chat with me, she told them that "I was on voice rest." The vocal fatigue was the major factor in causing my overall fatigue at the end of the day.

With ChatterVox, my voice is unaffected by the constant voice use each day. I have energy at the end of the work day! I was at a restaurant the other night with family members, and one of my sisters said, "It sure is nice that you can talk to us now during the school year...I've noticed that your voice is strong - that 'thing' is really working!"

As far as the cost...the ChatterVox is worth every cent. When other teachers ask me about it, I tell them that it's "worth its weight in gold."

Thank you!
